Fees and expenses

What you have to pay depends on the guarantee level you decide on – 75/75 guarantee, 75/100 guarantee or 100/100 guarantee – the segregated fund you hold, the market value of your total holdings and the amount of the advisory and management service (AMS) fee.

If you select a reset option additional fees apply.

These fees will be charged by redeeming units from each segregated fund.

Investment management fee

For each segregated fund you hold in your policy you will pay an investment management fee plus applicable taxes. The investment management fee varies depending on the guarantee level, segregated fund chosen and the market value of your total holdings.

The investment management fee bands will be set out in the preferred series 2 fee agreement.

Operating expense fee

For each segregated fund you hold in your policy you are responsible for paying all respective operating expenses related to preferred series 2 plus applicable taxes. The current annualized operating expense fee for each segregated fund will be set out in the preferred series 2 fee agreement. As operating expenses change, we may change the operating expense fee rate, from time to time without notice to you.

Advisory and management service (AMS) fee

For each segregated fund you hold in your policy you will pay an AMS fee plus applicable taxes. The AMS fee is negotiated between you and your advisor subject to our then-current administrative rules. The AMS fee must be between 0.50 per cent and 1.25 per cent and will be set out in the preferred series 2 fee agreement.

For more information about the fees, see *Fees and expenses* section in the information folder

Are there any guarantees?

This fund is being offered under an insurance contract. It comes with guarantees that may protect your investment if the markets go down. The insurance cost for the guarantee is included in the investment management fee. For details, please refer to the information folder and contract.

Who is this fund for?

A person who is investing for the longer term, seeking the growth potential of Asian and Pacific Rim companies and is comfortable with moderate to high risk. Since the fund invests in stocks its value is affected by stock prices, which can rise and fall in a short period of time.

Notes

Effective October 2023, this fund's risk rating has changed from "High" to "Moderate to high". In October 2015 Canada Life Asset Management Limited assumed portfolio management responsibilities from AGF Investments Inc. How has the fund performed?

This option does not deduct a MER but you pay fees that you agree to in your fee agreement directly. These fees reduce returns. See the *Ongoing expenses* section below for details.

It's important to note that this doesn't tell you how the fund will perform in the future. Also, your actual return will depend on the guarantee policy you choose and your personal tax situation.

A person who invested \$1,000 in the fund on December 31, 2013 would have \$1,875.93 on December 31, 2023. This works out to an average of 6.49% a year.
